

# AJ SAMMUT ELECTRICAL

# CAPABILITY STATEMENT

AJ Sammut Electrical is an electrical and communications installation contractor, providing high quality electrical services to the Mackay and surrounding regions.

# ABOUT US

## Overview

AJ Sammut Electrical is a privately owned company founded by Director Anthony Sammut in 2003, to service the Mackay region. Initially set up as a sole trader, Anthony grew the business to having over 17 employees consisting of qualified tradespeople, apprentices, and office staff. We have employed over 40 apprentices over the course of the businesses lifetime.

Since 2003, AJ Sammut Electrical has achieved consistent growth, by placing the client's requirements first and continuously delivering projects on time, within budget and safely. We have a strong focus on delivering outcomes with a proven record of success ensuring our high-quality, cost-effective services are delivered in a time-effective and personalised manner.

# OUR COMMITMENT

## To Safety

Our strong commitment to safety is ongoing with the team focusing on Workplace and Occupational Health and Safety on a day-to-day basis.

AJ Sammut Electrical is focused on:

- ✔ Ensuring a safe workplace for employees
- ✔ Continually striving to improve safety performance
- ✔ Developing a culture to achieve zero harm
- ✔ Ensuring each employee arrives home safe at the end of each day

## To People and Culture

AJ Sammut Electrical recognises employees as the company's most valuable assets and therefore has a commitment to providing ongoing training, development and support. Growing the business from just being a Sole Trader to now having a full team, is something Anthony Sammut prides himself on and strives to continually grow.

Our most important asset is our employees, that is why we offer ongoing internal and external training to all staff at AJ Sammut Electrical. By enabling staff to continually improve their skills, has resulted in high levels of employee satisfaction across the company.

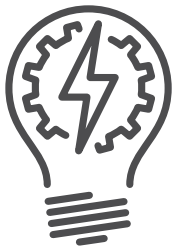

Regular training sessions are conducted with staff, focusing on manual handling, working at heights, the use of new tools and wiring rules. We are firmly committed to maintaining a consultative mechanism that leads to continuous improvement of our OH&S initiatives.
